SUMMARY

Software engineering student with 8 years of transportation operations experience building full-stack products around real user workflows. Developed Load Ledger, a domain-informed transportation management system, and deployed ADHD Study AI, a file-aware planning and tutoring platform. Seeking junior software engineer, full-stack, or internship opportunities.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, responsive and accessible UI

Backend & Data: Next.js API routes, Supabase, PostgreSQL, Drizzle ORM, authentication, row-level security

AI & File Workflows: OpenAI API, structured outputs, streaming responses, PDF/DOCX text extraction

Testing & Tools: Vitest, React Testing Library, Playwright, Git, GitHub, Vercel, npm

PROJECTS

Load Ledger - Full-Stack Transportation Management System

Next.js 16, React 19, TypeScript, Supabase, PostgreSQL, Drizzle ORM, OpenAI API, Vitest, Playwright |

github.com/JasonTroup-dev/Load-Ledger

- Designed a transportation management system from 8 years of operations experience, centralizing shipment status, dispatch details, client and carrier records, contacts, saved locations, notes, and attention flags.
- Built authenticated CRUD APIs and a relational PostgreSQL schema with Drizzle migrations for shipment, document, customer, carrier, and contact workflows.
- Implemented a review-before-save PDF intake flow that validates uploads, stores originals in private Supabase Storage, and uses typed OpenAI output to prefill shipment drafts without silently creating records.
- Added proof-of-delivery upload, embedded viewing, authenticated downloads, and document hashing; built 33 automated test files across UI, API, data, validation, and end-to-end workflows.

ADHD Study AI - Full-Stack AI Study Platform

Next.js, React, TypeScript, Supabase, PostgreSQL, OpenAI API, Tailwind CSS, Vercel | [Live](#) | [GitHub](#)

- Built and deployed an ADHD-focused platform that turns syllabi, assignments, and class materials into reviewed study plans, guides, flashcards, and clear next steps.
- Created PDF, DOCX, and text-file ingestion with AI classification and structured outputs, grounding generated content in each user's coursework while keeping users in control before data is saved.
- Implemented a streaming, context-aware tutor with multi-file attachments, saved session messages, guided timers, and Markdown and math rendering.
- Developed authenticated class workspaces, calendar and planner views, assignment tracking, Supabase-backed persistence, scheduling tests, and personalized focus-length and break-reminder settings.

EXPERIENCE

Executive Assistant - Mr. D's Transportation | Orange County, CA | 2016 - 2024

- Monitored up to 100 shipments per week, tracking high-value loads, time-sensitive delivery schedules, and changing pickup and delivery details.
- Maintained Excel-based status tracking, surfaced delayed shipments early, and documented issues requiring follow-up before they escalated.
- Coordinated communication across high-pressure delivery changes involving financial stakes, conflicting responsibilities, and multiple parties.

EDUCATION

Ira A. Fulton Schools of Engineering, Arizona State University | Bachelor of Science in Software Engineering | Expected Late 2027

Selected Coursework: Object-Oriented Programming & Data; Software Construction; Software Enterprise; Database Management; Operating Systems & Systems Programming
